

Dear Hiring Team at Skillz,

I am writing to express my strong interest in the Senior Product Manager (Engagement) role. Having scaled high-velocity engagement ecosystems at PhonePe—India's leading fintech platform—I have seen firsthand how gamified incentives and data-driven LiveOps can transform user behavior at scale. I am eager to bring this expertise to Skillz to drive the next phase of player session depth and retention.

At PhonePe, I spearheaded a gamified milestone system that scaled CLTV by 17% and optimized a ₹1000+ Cr annual marketing engine through 'Propensity to Transact' ML models. My work was centered on one core challenge: how do you keep millions of users engaged while maintaining the highest levels of platform trust? This duality is exactly what defines the Skillz mission. Your commitment to "competition for all" requires not just engaging mechanics, but a foundation of fairness and integrity—a discipline I honed during my tenure in risk and compliance.

What excites me most about Skillz is the opportunity to apply my experience in multi-tenant referral engines and context-aware incentivization to a gaming ecosystem that thrives on fair competition. I've managed monetization portfolios of ₹100 Cr/year and directed 0→1 launches like Kotak Cherry, and I am ready to apply that same aggressive growth mindset to increasing games played and session time for Skillz players globally.

Thank you for your time and consideration. I look forward to the possibility of discussing how my background in high-trust, high-scale engagement can contribute to the continued success of the Skillz platform.

Sincerely,

Ajay Avaghade
